

Activity Report for the fiscal year 2022

1. The Mazak Foundation granted subventions to domestic and overseas individuals, universities, and laboratories that are tackling researches into and developments for new technologies of high-production systems in production engineering, machine elements, information communication technologies, machine tools, and peripheral equipment such as robots. It also honored young research workers who presented excellent research papers in machine tools.

2. There were 42 applications for subventions and 27 applications for papers.

3. As a result of examination, 21 applicants were granted for subventions and 16 excellent papers were honored.
